 Made in Norway

Cinderella is part of the well-respected Sjøvik Group, which has been based in Sjøvika, Midsund, since 1903. In 2022, we opened our new cutting-edge factory in Lyngen, located in northern Norway, where all our toilet models are produced. With modern technology and dedicated employees, we are setting a new standard for premium toilet systems.

Our goal is not only to provide solutions that meet customer needs but also to contribute to addressing global challenges related to water and sanitation.

Cinderella is the natural first choice for those who value quality and functionality - when nature calls

COMFORT WITHOUT WATER AND SEWAGE

An incineration toilet is a water-free toilet where bio waste products are burned at high temperatures to a minimum amount of ash. The waste is safely incinerated in a closed incineration chamber, and the pollution-free gases from the incineration process are discharged through a separate exhaust pipe.

Incinerating toilets are a total waste solution, which means they get rid of all waste. There are no additional processes or messy emptying routines, such as other toilet systems require. The solution is odorless and hygienic. The bacteria free ash is completely free of all pathogens and can be discarded with the household garbage.

Incineration toilets are a popular toilet alternative since they don't require water or expensive sewage connection. With an incineration toilet it's possible to achieve almost the same toilet comfort as flush toilets, without the considerable costs associated with sewage systems.

Cinderella Incineration Toilets are the market leader in Europe and have been produced since 1997. All our toilets are manufactured in Norway to the highest quality and reliability standards. Our products are certified and approved according to current regulatory demands in each country we operate, giving confidence and peace of mind to all of our customers.

CINDERELLA COMFORT

ENERGY SOURCE – 240v ELECTRICITY

Cinderella Comfort has an enclosed air ventilation system ensuring efficient air circulation for optimal incineration and reduced energy consumption. Cinderella Comfort is CE Marked and approved by NEMKO and one of our most popular models.

- No water, No sewerage
- No odours
- Complete toilet solution, burns all waste to ash
- User friendly and child proof
- Easy to use
- Reliable control panel with LED's
- 1 cup of ash after 1 week of use

TECHNICAL SPECIFICATIONS:

- Weight: 34 kg
- Height: 600 mm
- Seat height: 540 mm
- Width: 390 mm
- Depth: 590 mm
- Capacity: 4 visits per hour
- Ventilation duct / pipes: 110 mm external dimensions
- Incineration power: 2000 W
- Energy consumption per incineration: 1.4kw/burn
- Power requirement: 220 - 240 V, 10A
- Max weight tolerance: 200 kg)

OTHER FEATURES COMFORT:

- Easy installation
- LCD display
- Enclosed ventilation system
- Certified and approved
- Perfect for off-grid solar systems
- 2 year warranty (*Some restrictions may apply)
- Well suited for year round cabins

CINDERELLA URINAL

DOES NOT REQUIRE WATER OR ENERGY

Cinderella Comfort has an enclosed air ventilation system ensuring efficient air circulation for optimal incineration and reduced energy consumption. Cinderella Comfort is CE Marked and approved by NEMKO and one of our most popular models.

- Ideal for cottages, leisure homes and Tiny Homes in combination with any one of our incineration toilets
- Waterless – the urine is led to an external collection tank or ejector tank.
- Unisex model.
- High quality product
Made in Norway
- Easy to use and install

TECHNICAL SPECIFICATIONS:

- Seated height: 420 mm
- Height: 460 mm
- Seat height: 540 mm
- Width: 340 mm
- Depth: 500 mm
- Weight: 6 kg
- Drain pipe: 50 mm
- Max weight tolerance: 150 kg

Cinderella Urinal is equipped with a membrane/odour trap that prevents unpleasant odours in the toilet room.

The urinal is cleaned like a regular toilet, we recommend using water and a mild cleaning detergent if necessary.

OTHER FEATURES URINAL:

- CE-marked, waterless urinal
- Unisex model, for both men and women
- Hygienic
- Frost proof
- Odour barrier to prevent odours
- Easy to install
- A high quality product made in Norway
- 2 year warranty (*Some restrictions may apply)

CINDERELLA TRAVEL

ADAPTED FOR CARAVANS, MOTORHOMES AND HOUSEBOATS.

Cinderella Travel is designed for mobile living environments such as canal boats, houseboats, caravans, and motorhomes. Cinderella Travel represents a totally new way to handle waste, easily, without the hassle of emptying in designated areas. The toilets are designed and produced in Norway, renowned for their longevity and high quality with excellent capacity and sustainable, ecological design – without polluting outcomes. Cinderella Travel provides a hygienic and easy way to dispose of toilet waste safely.

Cinderella Travel was launched on the market in 2013 as a further product development from the popular incineration toilets provided by Cinderella which have been available since 1997. Environmentally friendly Travel does not require main electrical power and uses only LPG gas or diesel and 12V DC control power.

Campers

Energy source: Diesel

Trucks

Recreational Vehicles

House and Narrow Boats

Horse Floats

Capacity: 3 - 4 visits pr hour

CINDERELLA TRAVEL DIESEL

ENERGY SOURCE – DIESEL

NEWS

Tilt function
for easier
maintenance

Cinderella Travel Diesel uses high quality diesel as an energy source for the incineration process itself and 12 V DC to control the electronics in the toilet. This makes the toilet perfect for installations in motor homes, horse trailers and trucks.

- Complete waste handling solution, incinerates all waste
- Does not use water
- No waste water tank
- No chemicals used
- Easy to use
- No odours
- Certified and Approved

TECHNICAL SPECIFICATIONS DIESEL:

- Weight: 20 kg
- Height: 540 mm
- Seat height: 490 mm
- Width: 390 mm
- Depth: 590 mm
- Capacity: 3-4 visits per hour
- Standby Power Consumption: 0.005 Amp
- Peak load: 15.0 Amp
- Power consumption (incineration): 1.5 Amp
- Diesel consumption: 1.5-2.5 dl per incineration
- Exhaust fan 12V DC
- Fuel: Automotive quality diesel / HVO100
- Electrical power supply: 12V DC / 10 Amp (11-14.4V)
- Maximum burner effect: 2,1 kWh
- Maximum altitude while incinerating: 1500 m

OTHER FEATURES COMFORT:

- User friendly and child proof
- 1 cup of ash after 1 weeks
- Reliable control panel with LEDs
- Perfect for full time caravanning-namad lifestyle
- CE Marked, certified and approved
- Complete toilet solution, burns all waste to ash
- 2 year warranty (*Some restrictions may apply)

COMPONENTS FOR AN OPTIMAL COMFORT INSTALLATION

We have upgraded several of the components in our installation packages. Our black pipes are optimized for ventilation, and UV-stabilised to avoid color fading over time. The flue terminal cap is important for optimal incineration and helps to keep the ventilation pipe free of twigs, leaves and other debris. Our flue terminal cap has a streamlined design and is available in black to match our new pipes. The elbow bend with condensation connector replaces our traditional T-bend. The bend is, like the flue pipes, UV-stabilised and will not fade over time. The bend also has the option of connecting to the condensation trap, most appropriate when the flue pipe is mounted inside the room.

Please note that new components are sold loosely as accessories and can easily replace older components on already existing installations.

FLUE TERMINAL CAP
Streamlined design and better airflow in the pipe

UV-STABILIZED PIPES
Black, matte color that will not fade over time. Optimized for ventilation

BEND WITH CONDENSATION CONNECTOR
Better airflow, easier installation and cleaning. The option to connect a condensation trap (indoors)

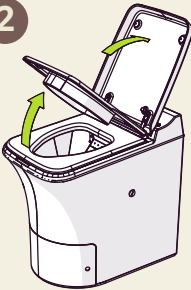

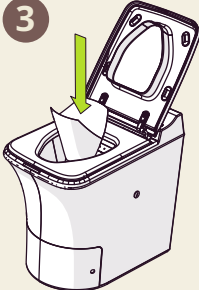

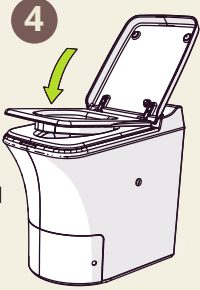

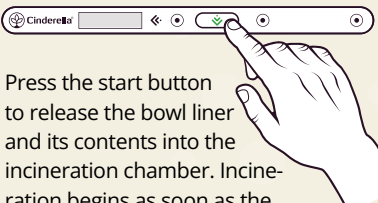

AIR INLET GRATE
For external installation in front of the air inlet pipe or wall vent, depending on the toilet model

A CINDERELLA INCINERATION TOILET IS EASY TO USE!

Using a Cinderella is much like using a regular toilet. the only difference is that you insert a bowl liner at each use and empty the ash container regularly.

- 1 Check that the green light on the control panel is lit; it indicates that the toilet has power and is ready
- 2  Lift the toilet lid and seat. A red light starts flashing. The fan starts.
- 3  Place a Cinderella bowl liner inside the toilet. Use a new bowl liner for each visit.
- 4  Lower the toilet seat. The toilet is now ready for use.
- 5  Use the toilet as usual. If only a small amount of waste is produced, it may be beneficial to pour 100–200 ml of water into the bowl liner to increase the weight.
- 6  Close the toilet lid.
- 7  Press the start button to release the bowl liner and its contents into the incineration chamber. Incineration begins as soon as the hatches close. The toilet is now ready for the next user.

- 8 During incineration, a yellow light remains steadily illuminated. Incineration is temporarily interrupted if a new visit is made to the toilet. The incineration time may vary depending on the number of uses and the amount of waste.

LINERS FOR YOUR INCINERATION TOILET

The bowl liner plays a crucial role in the function of Cinderella incineration toilets. Since these toilets do not use water to flush waste, the liner is necessary to transport the waste down into the incineration chamber in an efficient and mess-free manner. The liners are specially designed for this purpose, with carefully selected materials and a design that has been thoroughly tested for optimal functionality.

OUR COMMITMENT TO OUR ENVIRONMENT AND OUR SOCIETY

At Cinderella we design ecological solutions for the total management of toilet waste. In a world where water shortages and energy resources characterize areas with strong urbanization and population density, health challenges arise through failing or lacking sanitation. This is where Cinderella's incineration toilets can be an environmentally friendly alternative.

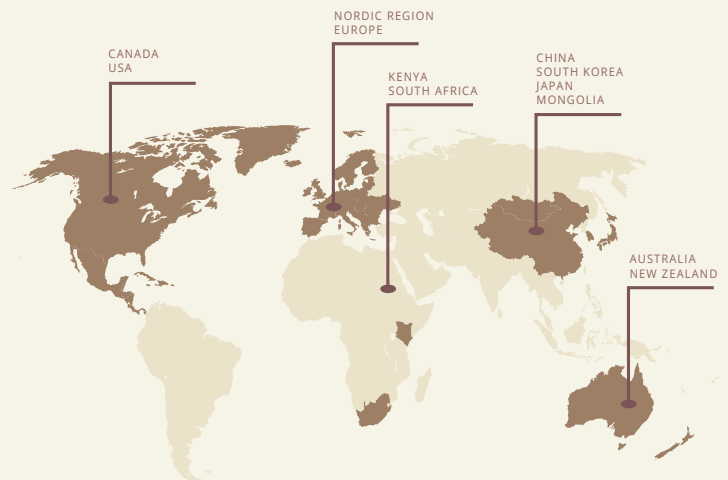

The UN's Sustainable Development Goals provide guide lines to important dimensions such as health, access to water and sanitation, innovation and responsible consumption, education and job creation as well as the preservation of life on earth and in water. Through our corporate social responsibility for the non-profit organization North South Partnership Aid, we are committed to contributing to the future of orphaned and vulnerable children in Kenya and Ethiopia. We donate our water-free

incineration toilets to children's villages that need safe sanitation, contributing to ensuring that precious water resources are used exclusively for hygiene, drinking and agriculture, not for flushing

At Cinderella, we develop environmentally friendly waste solutions that do not require access to water and can be adapted to different needs. Our incineration technology uses energy sources such as LPG gas or electricity and where electricity can be harnessed from wind power or solar. The result of the process is only a minimal amount of bacteria free ash that can be safely disposed of in ordinary household waste bins. In this way, we help to limit our ecological footprint, without the consumption of precious resources and without infectious or polluting emissions.
